

INSTRUCTIONS FOR COMPLETING
DIHS Patient Questionnaire Access to Care Worksheet
and
Reporting Form
DIHS QMD 008D

The data for this worksheet/form is obtained from the (50) fifty patient questionnaires regarding access to care (DIHS QMD 008C) given to randomly selected detainees. Underneath each question are the “Yes” and “No” responses. Each response has two blanks next to it. The first blank is for the total number and the second blank is for the percentage. For example, if for question number one, 48 out the 50 responded “Yes”, then 48 would go into the first blank and 96% ($48/50 = 0.96$) would go in the second blank. Repeat this procedure for the first four questions.

If there are areas for improvement, please use the DIHS Performance Improvement Discussion and Corrective Action Form (DIHS QMD 001) to outline the actions, which would be needed to correct any identified areas of concern.
