

INSTRUCTION FOR COMPLETING

DIHS Drug Utilization Form

DIHS QMD 002

Use the instructions for completing the DIHS Performance Improvement Study Worksheet and Reporting Form for information on how to fill out the drug utilization form. In addition, two examples have been given for both Ibuprofen and Isoniazid since there are two drugs frequently monitored by facilities. The examples enclosed are simply that—examples. They can be modified and changed as per the local performance improvement committee.
