

The physician should initial numbers 1 thru 5 after discussing each with the detainee.

I, _____, Alien#. _____ hereby authorize Dr. _____ or his/her relief (designee), to prescribe amitriptyline (Elavil), desipramine (Norpramin), doxepin (Sinequan), imipramine (Tofranil), or nortriptyline (Pamelor) an antidepressant medication to me and to continue said medication as is recommended for my psychiatric treatment.

1. ___ This medication is useful because it has been found to be effective in treating depression and its associated symptoms including sadness, fatigue, hopelessness, sleeplessness, loss of appetite, loss of interests, loss of concentration, suicide, or self harm ideation. This medication may also be effective in treating other disorders, such as panic disorder, obsessive-compulsive disorders, headaches and certain other types of pain.

2. ___ This medication may improve your condition by relieving all or some of the symptoms mentioned above.

3. ___ Common side effects to this medication include, but are not limited to, dry mouth, blurred vision, constipation, tremor, unpleasant taste, drowsiness, dizziness, headache, tiredness, and weight gain. These effects are frequently temporary or can be controlled with a change in dosage. Less common complaints include irregular or rapid heart beat, blurred vision, problems urinating, and decreased sex drive. We have reviewed the fact that if you have conditions such as cardiac arrhythmias, glaucoma, liver function impairment or kidney function impairment, it may be preferable to use other medication.

If any of the above symptoms occur, you should notify Medical Staff at sick call as soon as possible.

4. ___ Not taking this medication as prescribed by the physician's instruction may lead to a worsening of symptoms. However, some symptoms of depression and related disorders may get better or even go away without taking medication. Also, the risk of suicide may be increased by not taking this medication.

5. ___ Other treatment options include other medication with similar benefits. Other drugs may cause some of the same side effects you might experience with this medication. Other treatments may not include any medication, but may involve individual counseling by a psychologist or other medical professional.

Based upon interview, assessment, and medical record review, it is my opinion that this patient understands the proposed treatment, and **is competent** to give consent.

Physician Signature _____
